GitHub : github.com/akib-dabgar

Professional Summary

Full-Stack Developer with 3+ years of experience building scalable web applications using React.js, Node.js, and NestJS. Experienced in developing end-to-end applications, creating responsive user interfaces, building secure RESTful APIs, and working with SQL and NoSQL databases. Skilled in microservices architecture, RabbitMQ, JWT authentication, role-based access control (RBAC), real-time systems. Leveraged AI-assisted development tools such as Cursor and Claude to accelerate development, improve code quality, and enhance team productivity.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL
Frontend : React.js, Redux, Redux-Saga, Next.js,
Backend: Node.js, Express.js, NestJS, RESTful & Microservices Architecture, CQRS Pattern
Databases: MongoDB, MySQL, PostgreSQL, TypeORM, Query Optimization, Indexing
Messaging & Real-Time: RabbitMQ, Socket.io, SignalR, Webhooks, Event-Driven Systems
Security: JWT Authentication, Role-Based Access Control (RBAC), AES Encryption
Payments Integrations: QorPay, MassPay, US Bank ACH, Transaction Reconciliation
DevOps &Tools: Docker, Git, GitHub Actions, GitLab CI/CD, Bitbucket, Postman, Firebase, Puppeteer, SendGrid, Redis
Practices : Agile/Scrum, Jira, Code Review, Unit Testing, AI-Assisted Development (Claude, Cursor)

PROFESSIONAL EXPERIENCE

Full-Stack Developer | eSparkBiz Technologies Pvt. Ltd., Ahmedabad | Jan 2023– Present

Responsibilities :

- Architected scalable REST APIs and full-stack applications using React.js, Node.js, and NestJS for enterprise clients.
- Implemented JWT authentication, RBAC, and AES encryption across frontend and backend layers.
- Optimized MySQL and PostgreSQL queries, reducing database response times by 40%.
- Implemented frontend virtualization for report modules handling thousands of records efficiently.
- Built event-driven microservices using RabbitMQ for asynchronous communication and service integration.
- Implemented Redis caching to reduce API response times and improve application scalability.
- Collaborated in Agile/Scrum teams using Jira, Git, GitLab, and Bitbucket.
- Translated complex business requirements into technical specifications and scalable solutions.

Projects :

ChainIT Pay | NestJS, React.js, PostgreSQL, RabbitMQ, TypeORM

- Designed a scalable microservices payment platform supporting secure transactions and automated multi-recipient payouts.
- Integrated QorPay, MassPay, and US Bank ACH APIs with webhook-based real-time payment and settlement tracking.
- Engineered ACID-compliant PostgreSQL ledger workflows with RabbitMQ-based transaction processing.

Tax Sale Management System (TSM) | React.js, Redux-Saga, Node.js, Express.js, MySQL

- Developed an enterprise property-tax platform for tax lien sales, foreclosures, auctions, and redemption workflows.
- Enhanced 20+ modules with React.js and Redux-Saga for complex state management and asynchronous operations.
- Automated deadline scheduling, notifications, and PDF generation using SendGrid and Puppeteer.

Radefy | React.js, Redux, SignalR, PWA

- Architected a multi-tenant hotel SaaS platform with role-based dashboards across Admin, Customer, and Guest users.
- Enabled real-time messaging using SignalR for instant communication across hotel operations.
- Integrated third-party APIs such as Welcome Pickups and Musement for airport transfers and local guest experiences.

EDUCATION

Master of Computer Applications (MCA) — Saurashtra University | 2021–2023

Bachelor of Computer Applications (BCA) — Shree G.K. & C.K. Bosamia College | 2018–2021
